Badulla, Sri Lanka

2002/09/19

EDUCATION

November 2023 - Present
BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY, SLIIT

2021(2022)
G.C.E. A/L, BADULLA VISHAKA GIRLS' HIGH SCHOOL

SKILLS

- Project Management
- Interpersonal skills
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Coding Skills

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Sinhala (Intermediate)

PROFILE

Passionate and hardworking IT undergraduate at SLIIT with a strong foundation in full-stack web development, mobile application development, and database management. Experienced in building end-to-end solutions using technologies including React.js, Spring Boot, Node.js, PHP, and Kotlin across multiple academic and group projects. Eager to apply theoretical knowledge in a practical internship setting, contribute to real-world software solutions, and grow through collaborative, hands-on challenges.

ACADEMIC PROJECTS

Online Booking System - Group Project (PHP, VS Code, XAMPP)

- Developed a dynamic web-based online booking platform as a group project, enabling users to manage appointments through a secure login system
- Built using PHP and MySQL for backend functionality with XAMPP for local hosting. Key features include user authentication, booking management, and automated email notifications.

Online Staff Management System - Group Project (Java, Eclipse IDE, MySQL)

- Created a Java desktop application using the Java and Eclipse IDE
- Applied JDBC for MySQL connectivity ,used OOP concepts in Eclipse and basic MVC principles
- Designed and tested functionalities like staff CRUD, reporting, and role access

Smart Campus Operations Hub

- Developed a web-based Smart Campus Operations Platform
- Built using Spring Boot for the backend with PostgreSQL and MySQL databases
- Implemented RESTful APIs, Google OAuth2 authentication, and a React-based frontend with a shared layout and sidebar system for UI/UX consistency.

Smart Hostel Management System

- Developed a full-stack hostel management system for university students as a group project using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Responsible for the Billing & Payment Tracking component
- Implemented an admin dashboard and notification center for streamlined hostel operations.

MediTrack — Personal Health Tracker with Doctor View Portal

- Developed a full-stack MERN application for real-time personal healthcare tracking with a dedicated doctor view portal
- Enabled patients to log and monitor health data while allowing doctors to access patient records through a role-based portal
- Built using MongoDB, Express.js, React.js, and Node.js with RESTful API integration

- **WellMe — Wellness Mobile Application**
  - Developed a mobile wellness application using Kotlin and Android Studio focused on promoting mental and physical well-being
  - Implemented user authentication, a home screen with motivational content and a dashboard with navigation to core modules
  - Designed a clean, calming UI to encourage healthy routines and mindfulness, with progress insights to help users maintain their personal wellness goals.
